

## SHALLEEL MOHAMUD

Meadow Lark Lane, Morcellement Piat no. 2, Curepipe, Mauritius

Phone: +230 57 47 87 27 / +230 58 28 28 05

Email: [shalleel.mohamud@umail.utm.ac.mu](mailto:shalleel.mohamud@umail.utm.ac.mu)

Date of Birth: 23 January 1987

Religion/Faith: Islam

Marital Status: Single

Arm Reach: 216 cm

---

## PROFESSIONAL PROFILE

Electronics engineer, virtualization specialist, and full-stack developer with over 11 years of experience across telecommunications, cloud infrastructure, and software engineering. I hold a BSc (Hons) Electronics Engineering from the University of Technology, Mauritius and am currently completing a BSc (Hons) Computer Science with Network Security (Top-Up, Part-Time), Year 3 Semester 1, with two remaining semesters (one placement-oriented and one capstone project).

I am committed to staying aligned with the latest technologies in a virtualization-driven world where security, Linux, and macOS ecosystems demand continuous learning and advanced problem-solving. Although my foundation is in Electronics Engineering, I am currently completing a one-year BSc (Hons) Computer Science with Network Security Top-Up at UTM. This “recatch” year formally validates and benchmarks the skills I have already been using for years as an Intermediate Engineer, and prepares me academically to progress into an MSc Computer Science with Emerging Technologies from December 2026 (part-time, 18–30 months, subject to work, travel, and training commitments). Given my extensive hands-on experience in software development, system administration, and virtualization, I am fully capable of handling demanding postgraduate studies while maintaining top performance in my current role at Parallels Desktop. I see myself as a perpetual developer and engineer: each new certification or degree is not an endpoint but a new platform from which to reach higher levels of technical excellence, research capability, and real-world impact.

---

## KEY STRENGTHS

- 11+ years in telecom, virtualization, enterprise support, and software development

- Strong mix of hands-on engineering, customer-facing experience, and R&D mindset
- Virtualization & Cloud: Parallels, VMware, Hyper-V, Azure, AWS
- Identity, Security & Network: Active Directory, Entra ID (Azure AD), MFA, SSO, Conditional Access
- Full-Stack & Mobile Development: Laravel, Vue/React, Flutter, REST APIs, CI/CD
- Proven ability to troubleshoot complex incidents and deliver stable, secure solutions

---

## PROFESSIONAL EXPERIENCE

### Parallels Desktop (Software Development) MRU Ltd

Intermediate Virtualization & Software Engineer – Parallels Desktop & Remote Application Server

Remote & On-site, Ebene NEXSKY | Nov 2022 – Present

- Deliver 24/7 technical support for installation, configuration, optimization, and lifecycle management of virtual machines running Linux (Debian, Kali, Fedora, Ubuntu, CentOS, RHEL, Rocky, Alma, BSD), macOS (Intel & ARM), and Windows (98–11 Pro, Windows Server Desktop & Datacenter 2008–2025).
- Deploy, configure, and maintain Parallels RAS, Secure Client Gateways, and High Availability Load Balancers (HALB), achieving 99.9% uptime and secure remote access for enterprise customers.
- Integrate third-party APIs and services; harden systems using advanced authentication, encryption, patch management, and best-practice security baselines.
- Design, configure, and troubleshoot Jira workflows to support agile sprint cycles and efficient incident management.
- Develop and maintain web applications using PHP (Laravel) with MySQL and PostgreSQL; build RESTful APIs, optimize SQL queries, and improve application performance and reliability.
- Build modern front ends using Vue.js and React with Bootstrap, ensuring responsive UX and clean, maintainable code with Git-based workflows (GitHub, GitLab, VS Code, Docker, Postman).
- Develop cross-platform mobile applications (Flutter, React Native, hybrid frameworks) from prototype to deployment on Firebase/Firestore, including secure back-end integration and cloud configuration.

- Author and maintain detailed technical documentation, knowledge base articles, and internal Wikis for B2B and B2C customers, significantly reducing resolution times and repeat incidents.

Key Tools & Technologies: Parallels RAS, VMware ESXi, Hyper-V, Azure, AWS, Docker (Mac & Windows), PowerShell, Bash, Git/GitHub/GitLab, IntelliJ IDEA, VS Code, Roo Code, Postman, Jira, AnyDesk, TeamViewer, LogMeIn.

---

## **Orange Business Services MRU Ltd**

Mobile Communication Engineer Specialist & Technician

Remote & On-site, Ebene Cyber Tower 2 | Mar 2017 – Sep 2022

- Provided Tier-2 technical support for enterprise mobile communications, M2M/IoT solutions, and business web applications (Genergy, MyTools, MonSI, CRM, DISE, Microsoft Teams, billing tools, UTILISANOO, Orange Plaza, Orange Recharge, self-service portals).
- Managed corporate SIMs, MDM platforms, and SLAs for large account customers, ensuring high availability, security, and compliance with telecom and networking standards.
- Performed preventive maintenance and performance audits; produced “Vie du Réseaux” and KPI dashboards using advanced Excel (VLOOKUP/XLOOKUP, nested formulas, macros), VBA, and Power BI for senior management.
- Handled complex billing issues, disputes, and service incidents while maintaining excellent customer satisfaction and strict SLA adherence.
- Supported digital transformation by promoting self-service and online tools, simplifying customer journeys across omnichannel touchpoints (email, phone, web).
- Prepared weekly and monthly performance reports for account managers and executives, improving capacity planning, service quality, and decision-making.
- Mentored and supported customer support advisors; shared technical expertise, best practices, and detailed process knowledge to uplift overall team performance.

---

## **CSL Mauritius – Mauritius Telecom Outsourcing**

Customer Service Agent & Quality Assurance Agent (L1)

On-site, Ebene Orange Tower | Feb 2014 – Feb 2017

- Handled calls, chats, and emails for MyT and telecom customers, delivering accurate, clear, and courteous technical and billing support.
- Collaborated with product development teams by relaying customer feedback and trends, contributing to enhancements of prepaid and value-added services.
- Performed regular audits of customer accounts and billing records, quickly correcting discrepancies and ensuring data integrity.
- Supported system upgrades by communicating changes and impacts to internal teams and customers, minimizing disruption.
- Promoted to Quality Assurance Agent (L1); monitored and evaluated agent performance using KPIs:
  - First Call Resolution (FCR)
  - Average Handle Time (AHT)
  - SLA compliance
  - Quality Score (call audits)
  - Customer Satisfaction (CSAT/NPS), Call Abandonment Rate
- Presented monthly QA reviews and recommendations to management, directly influencing training programs, scripts, and process improvements.

---

## EDUCATION

BSc (Hons) Electronics Engineering

University of Technology, Mauritius (UTM) – Awarded Aug 2018

BSc (Hons) Computer Science with Network Security (Top-Up, Part-Time) – In Progress

University of Technology, Mauritius

- Current Level: Year 3, Semester 1
- Remaining: 2 semesters (1 placement-oriented for part-timers, 1 capstone project)

Recent Academic Performance – Year 3, Semester 1

- Operating System Administration with Active Directory – A
- Server-Side Web Programming – A
- Agile Software Engineering – A
- Cross-Platform Mobile Applications – A
- Research and Innovation – A

## School Certificates

- SC – KEATS College, Chemin Grenier (2004) – Pass with Merit
- HSC – KEATS College, Chemin Grenier (2006) – Pass

---

## CERTIFICATIONS & ADVANCED COMPETENCIES

### Enterprise Identity & Access Management (Microsoft Ecosystem)

- Active Directory Domain Services (AD DS): design, installation, and administration of multi-domain/multi-forest environments; authentication, authorization, directory services, and identity governance.
- Microsoft Entra ID / Azure AD: cloud identity and access for SaaS, cloud, and hybrid environments; user, group, device, and role management.
- Hybrid Identity: Entra ID Connect/Cloud Sync, identity synchronization between on-prem AD DS and Entra ID; password hash sync, pass-through authentication, and hybrid join.
- AD Certificate Services (AD CS) & PKI: enterprise and standalone CA deployment, certificate templates, auto-enrolment, PKI hierarchy, CRL/OCSP, smart-card and device authentication.
- Active Directory Federation Services (AD FS): claims-based authentication using SAML, OAuth, OpenID Connect; SSO with cloud and third-party applications.
- Advanced Security Controls: SSO, MFA, Conditional Access, passwordless authentication (FIDO2, Windows Hello), Privileged Identity Management (PIM).

### Operations, Security & Resilience

- DNS, DHCP, FSMO roles, AD Sites & Services, RODC deployment and management.
- Tiered AD model (Tier 0/1/2), DMZ integration, managed service accounts (MSA/gMSA), delegation of control, Windows LAPS.
- Backup & Restore: System State backups, authoritative/non-authoritative restores, domain/forest recovery planning and execution.
- Replication troubleshooting, lingering object cleanup, and health monitoring using Azure Monitor, Microsoft Sentinel, and SIEM tools (Splunk).

---

## TECHNICAL SKILLS

## **Systems & Platforms**

- Windows Server (2008–2025): AD, GPO, DNS, DHCP, security hardening, remote access.
- Linux (Ubuntu, Debian, CentOS, Fedora): installation, configuration, performance tuning, shell scripting.
- macOS: administration from Lion to Sonoma; cross-platform integration and virtualization.
- Virtualization: Parallels Desktop, VMware, Hyper-V, QEMU, VirtualBox – environment setup, migration, performance optimization, lifecycle management, and advanced troubleshooting.

## **Networking & Security**

- WAN/LAN, VLANs, VPN, DNS, DHCP, NAT, IPsec.
- Firewalls & Endpoint Security: FortiClient, Zscaler, Cisco security tools.
- Identity & Access Management: AD/Entra ID, AD FS, MFA, SSO, Conditional Access; secure remote connectivity, access governance, and monitoring.

## **Cloud & DevOps**

- Cloud Platforms:
  - AWS: EC2, S3, IAM, VPC.
  - Azure: Virtual Machines, Azure AD/Entra ID, Networking, Azure Virtual Desktop (AVD), Intune.
  - GCP: Compute Engine, Cloud Storage, Docker and Kubernetes (containerization).
- DevOps & Automation:
  - CI/CD: Jenkins, GitHub Actions – pipeline setup, automated testing, and deployments.
  - IaC: Terraform, Ansible (basic–intermediate).
  - Scripting: PowerShell (AD, Azure, AWS), Bash, basic Python, REST APIs.
  - Monitoring & Backup: Nagios, SolarWinds, Veeam Backup & Replication, SIEM (Splunk, Microsoft Sentinel).

## **Software & Development**

- Backend: PHP (Laravel), RESTful API design, server-side scripting.
- Frontend: Vue.js, React, Bootstrap, HTML/CSS/JavaScript.

- Databases: MySQL, PostgreSQL, Microsoft SQL Server, MySQL Workbench, DBeaver, SQL Workbench; NoSQL (Firestore, SQLite) – design, optimization, complex queries, remote configuration, and performance testing.
- Mobile & Cross-Platform: Flutter (Dart), React Native, hybrid frameworks; Cordova and Capacitor plugins; full lifecycle from VS Code to Firebase/Firestore hosting and deployment to iOS/Android.
- Productivity & ITSM: Microsoft Office (Excel, Word, PowerPoint, Outlook), advanced Excel (VBA, macros), Power BI, Power Platform, ServiceNow, Jira, Agile/Scrum practices.

---

## SELECTED PROJECTS

- World of Games (WOG): Full-stack Laravel + Vue.js web application deployed on local and cloud servers, with RESTful APIs, secure authentication, and performance optimization.
- Cross-Platform Mobile Apps (iOS & Android): Digital Library Showcase, VM Monitor, Shopping App, Loto Simulator, Local Religious Ecosystem app, XML to JSON Converter, Netflix-style media app, Solar smartphone-charging concept with app integration.
- IoT & Embedded Systems: Intelligent Fire Sprinkler System; IoT Smart Border Security System (marine research collaboration).
- Virtualization & Compatibility: macOS image emulation and cross-platform compatibility testing across multiple OS environments.
- 3D & Design: 3D architectures and models using Blender, FreeCAD, and MeshMixer.

---

## LANGUAGES

- English – Excellent written and verbal (business and technical)
- French – Expert level (technical, business, and customer communication)
- Urdu – Native/fluent
- Hindi – Professional working proficiency
- Russian – Conversational to intermediate
